FLOWGUARD® PLUS
CPVC PLUMBING SYSTEMS™

PARAMETERS	FLOWGUARD® PLUS PIPE & FITTINGS	PIPES PROCESSED FROM NON-FLOWGUARD® PLUS CPVC MATERIAL	REMARKS
Vicat Softening	Pass	Fail	Non-FlowGuard® Plus CPVC product has continuous problem in hot water lines.
Vice Crush	Pass	Fail	In Non-FlowGuard® Plus CPVC product, material is inconsistent which weakens pipe and has high risk of pipe failure.
Sustained Pressure Test at 82°C	Pass	Fail	Non-FlowGuard® Plus CPVC product has less life expectancy.
Manufacturing Process	Finished products manufactured exclusively by our global network of select manufacturing partners to ensure product quality and consistency	Manufactured by multiple parties utilizing various raw material sources.	FlowGuard® Plus pipes have strong quality control and has no batch variation.
Specification & Code Acceptance	All top ten national builders specify our technology by name. Leader in testing and code acceptance efforts.	No national specification. Limited code support.	FlowGuard® Plus pipe is strong on technical ground and is a well accepted brand.
Product Consistency	All compounds and finished goods produced to one standard. Quality Assurance Program helps ensure that the highest quality CPVC finished goods are delivered to the marketplace.	Multiple formulation and raw material process.	FlowGuard® Plus pipe assures product uniformity.

PRODUCT UNIFORMITY

Our superior compounds help customers deliver uniform FlowGuard® Plus Pipes, Fittings and solvent cement. Bringing the peace of mind that comes with high-quality piping systems that will serve the needs of a home, business or community for decades.
